5. Sc around
6. Sc around
7. Dec, inc, inc
8. Dec, sc to end. Finish off, leave tail to sew to body

Before attaching the legs, I used some wire and curled the ends to keep the wire end from poking out. I inserted the wire into the leg, left about an inch of wire sticking out from the leg, curled the end and inserted the wire into the body before sewing the leg to the body. The wire allows the degu to stand, as well as make it slightly poseable. If giving this to a young child, wire and safety eyes may not be appropriate.
